

# ERROR IN CC BILL FILE

3/9/98

Sometimes the CREATE step in the CC BILL process (CCBILL.STREAMS) has a error that causes the SEND step (CCBILLS.STREAMS) to fail.

The first thing to do is to check the \$STDLIST. It will tell you how many records transmitted correctly. It is around this line # in the **DMDEPOS2.PUB.SGA** file that you need to start checking for errors. You can also do a **FIND** on *any string of numbers* that the \$STDLIST shows in error. This will give you a clue as to where the problem might possibly be.

1. Go into editor and text in the file **DMDEPOS2.PUB.SGA**.

(the file *created* by CCBILL.STREAMS---the file that is *sent* by CCBILLS.STREAMS)

2. Save it as a different file name just in case you mess up while editing.

3. Exit out of editor, then go back in and text in DMDEPOS2 again (the other file is now your safe backup).

4. Text in **DMDEPOS2**.

5. Look in the area where the suspected errors might be.

6. Turn on DISPLAY FUNCTIONS <F7>.

7. Do a **LIST** of about 10 lines before and 10 lines after the line listed in step #5.

8. Look for ALT Characters other than C/R.

9. Turn off Display Functions <F7>.

10. Once found, delete the bad Alt Character(s).

NOTE: the ALT character is offset by one or two spaces, so make sure to put under the "D" one or two spaces *to the right* of the character you are trying to delete.

You also have to make sure keep the proper sequence up in sequence (see page 2).

11. Now try another send:

MACS | PRODUCTION MAMAGEMENT| CREDIT CARD PRODUCTION | SEND CC BILLING FILE (RJE)

The other problem might be in the sequence of the numbers or the #s themselves.

See page 2

The other problem might be in the sequence of the numbers or the #s themselves.

When in editor, you will first see the Editor line # (lines 231 thru 240 are pictured below).

The following table shows how DMGT needs to see each line, starting with the first letter "C."

<u>Field Name</u>	<u>Position</u>	<u>Length</u>
Record Identifier	1-2	2
MZI Order #	3-16	14
User Area	17-18	2
Division #	19-24	6
Record Type	25-25	1
Credit Card #	26-41	16
Order Amount	42-48	7
Expiration Date	49-52	4
Auth #	53-58	6
Auth Date	59-64	6

231	C	<u>47035990001</u>	428912C	<u>6011006960065564</u>	0010690	<u>0999</u>	028071	<u>980228</u>	D
Line in Editor		MZI Order #		Credit Card #	Amount	Exp.	Auth #	Auth Date	

231	C	47035990001	428912C	6011006960065564	0010690	0999	028071	980228	D

- Use the Order # or Credit Card# to look at the order in ORDER MANAGEMENT.
- Do a print screen of the order.
- Now you can see what the actual data is supposed to be and can repair the line in editor.
- Make sure all the spacing is correct according to the above chart,

AND that the line is similar in data & spacing to the surrounding lines.

NOTE: 15 digit credit cards still need to take up 16 spaces.  
Use the 15 digits and then leave a *blank space* before the amount field.

- Now try another send:

MACS | PRODUCTION MANAGEMENT| CREDIT CARD PRODUCTION | SEND CC BILLING FILE (RJE)

- If worse comes to worse---and you can't find the correct CC#----you can always substitute any credit card # to get the CC BILL SEND to work.
- Then you have to get with Ann Schmidt to let her know that she needs to bill that Order #/CC Card manually
